

IT'S SCIENCE TIME!

A. Play the Letter Scramble game. Unscramble the jumbled words. The first one to finish deciphering all the words in each category wins!

Word Category A Space & Science

gmoclooists
ivuernse
codviersy

Word Category B Stephen Hawking

hewelhirca
pdalysear
tysicphis

B. Classroom Project: Our Solar System

You may think that the Earth is a pretty big place, but the Earth isn't even the biggest planet in the Solar System!

There are eight planets that orbit around the Sun:

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.

Your English teacher will help you to find online information about the dimensions of the planets, and their distance from the Sun. Work in pairs or small groups, create these planets and make a scale model of our solar system!

What you'll need

| | |
|------------------|----------|
| Paper | Scissors |
| Pencils and Pens | Glue |
| Drafting compass | |

TIP!

Don't forget to label the planets when you create them.
